

INTEGRATED STUDIES (B.A.)

The Bachelor of Arts (B.A.) in Integrated Studies allows students to create individually-developed courses of study. This program is ideal for students with a clear idea for a career path that requires coursework from a variety of disciplines. The degree encourages students to develop a better understanding of the interrelationships among diverse ideas and academic subjects. The major also offers students courses that do not fall under a traditional academic Department. While providing flexibility in meeting individual student interests and learning goals, the Integrated Studies program blends existing and new experiences, information, and perspectives into the learner's total understanding of their world.
